

SaludSimple.org

Product Requirements Document (PRD)

Version 1.0 | June 2025

1. Project Overview

Site name	SaludSimple.org
Purpose	A bilingual (Spanish/English) resource hub helping Latino families in the US navigate healthcare, food assistance, disability services, mental health, and other community support systems.
Primary audience	Latino families, immigrants, caregivers, and community members in the US — many of whom are Spanish-dominant.
Default language	Spanish. Users can toggle to English via a persistent switch button.
Tech stack	HTML5, CSS3, Vanilla JavaScript (no frameworks)
Responsive	Yes — mobile-first, fully responsive for desktop and mobile.
Project folder	Personal Projects > Ellie's website
Images folder	Personal Projects > Ellie's website > images

2. Design System

2.1 Color Palette

Bosque (Primary)	#2E8B7A	Navbar, section headings, primary buttons, footer background
Salud (Primary mid)	#3AAFA0	Hover states, section dividers, card borders
Fondo claro (Light bg)	#D8F2EF	Alternating section backgrounds, info boxes
Comunidad (Accent 1)	#E07B39	CTAs, icon accents, hover highlights
Apoyo (Accent 1 mid)	#F4A261	Card icons, tag backgrounds, badge fills
Oro (Accent 2)	#D4A017	Callout banners, announcement strips, special badges (use sparingly)
Fondo (Page bg)	#F8F5F1	Global page background (warm off-white, not pure white)

Texto (Body text)	#3A2E26	All body text, paragraphs, labels — warm dark brown (not cold black)
Muted (Secondary text)	#7A6F66	Captions, meta info, placeholder text, footer secondary text

2.2 Typography

Primary font	Nunito (Google Fonts) — warm, rounded, highly legible. Import via Google Fonts CDN.
Fallback	sans-serif
H1 — Page titles	Nunito Bold, 2.5rem, color: #2E8B7A
H2 — Section titles	Nunito Bold, 1.8rem, color: #3A2E26
H3 — Subsection titles	Nunito SemiBold, 1.3rem, color: #E07B39
Body text	Nunito Regular, 1rem (16px), color: #3A2E26, line-height: 1.7
Small / captions	Nunito Regular, 0.875rem, color: #7A6F66
Nav links	Nunito SemiBold, 0.95rem, color: #FFFFFF
Button text	Nunito Bold, 0.95rem, uppercase, letter-spacing: 0.05em

2.3 Spacing & Layout

Max content width	1200px, centered with auto margins
Section padding	80px top/bottom on desktop, 48px on mobile
Card border radius	12px
Button border radius	8px
Box shadow (cards)	0 2px 16px rgba(46,139,122,0.08)
Grid system	CSS Grid and Flexbox — no external framework

2.4 Inspiration Sites

The following sites should be referenced for layout, warmth, and navigation patterns:

- <https://autismsociety.org/> — card layouts, warm typography, clear navigation
- <https://opwdd.ny.gov/> — structured resource organization, section clarity
- <https://www.hispanicfederation.org/es/our-work/health/> — Latino audience tone and visual energy
- <https://includenyc.org/> — accessible layout, disability resource structure
- <https://asghr.org/> — colorful multi-accent palette used professionally

3. Global Components

3.1 Navbar

The navbar is fixed to the top of the viewport on scroll. It contains:

- Left: Logo placeholder (square ~48px) + site name 'SaludSimple' in Nunito Bold, white
- Center: Navigation links (see Section 5 for label mapping)
- Right: Language toggle switch (ES | EN) + optional search icon

Navbar background: #2E8B7A. On scroll, add a subtle box-shadow. On mobile, collapse nav links into a hamburger menu (☰) that opens a full-width dropdown drawer.

Nav link labels (abbreviated for width — full section names shown in Section 5):

Navbar Label	Full Section Name (ES)	Full Section Name (EN)
Salud	Seguro Médico y Atención	Health Insurance & Care
Medicamentos	Medicamentos	Medications
Niños	Niños y Discapacidad	Children & Disability
Comida	Comida y Nutrición	Food & Nutrition
Sistema	Asistencia en el Sistema de Salud	Navigating Healthcare
Mental	Salud Mental	Mental Health
Ayuda	Ayuda General	General Help

3.2 Language Toggle

- Displayed in the top-right corner of the navbar at all times.
- Style: pill-shaped toggle switch with 'ES' and 'EN' labels. Active language shown with white text on #2E8B7A background; inactive in muted style.
- Default language on first load: Spanish (ES).
- Preference saved to localStorage under the key 'saludsimple_lang'. On subsequent visits, the saved preference is restored automatically.
- On toggle, all visible text on the page updates instantly via JavaScript without a page reload, using data-es and data-en HTML attributes on every text element.
- The toggle is also repeated in the footer.

3.3 Hero Section (Homepage only)

- Full-width banner below the navbar.
- Background: rich teal gradient from #2E8B7A to #3AAFA0, or a semi-transparent overlay on top of patient.JPG or patient2.JPG.
- Headline (ES): 'Entender el Sistema de Salud. Encontrar recursos. Obtener Ayuda. Comunidad Latina Unida.'
- Headline (EN): 'Understanding the Healthcare System. Finding Resources. Getting Help. United Latino Community.'
- Subheadline (ES): 'Tu guía de recursos para la comunidad latina en los Estados Unidos.'
- Subheadline (EN): 'Your resource guide for the Latino community in the United States.'
- CTA Button (ES): 'Explorar Recursos' → scrolls to section cards. CTA Button (EN): 'Explore Resources'
- Button style: #E07B39 background, white text, 8px border radius, bold.
- Hero height: ~500px desktop, ~380px mobile.

3.4 Section Cards (Homepage)

- Below the hero, display 7 clickable cards — one per main section — arranged in a responsive grid (3 columns desktop, 2 tablet, 1 mobile).
- Each card: icon or image thumbnail, section title, 1-line description, arrow link.
- Card background: white. Border-left: 4px solid with a distinct accent color per card (rotate through palette).
- On hover: slight lift (transform: translateY(-4px)), border-left changes to #E07B39.

3.5 Footer

- Background: #3A2E26 (warm dark brown). Text: #F8F5F1.
- Three columns: (1) Logo + site name + tagline, (2) Same nav links as navbar, (3) Contact info + social media.
- Contact info placeholder: 'contacto@saludsimple.org'
- Social media: placeholder links for Facebook, Instagram, YouTube (icons, no URLs yet).
- Language toggle repeated in footer.
- Bottom bar: '© 2025 SaludSimple.org — Todos los derechos reservados.' | 'All rights reserved.'

4. Language System Implementation

Do NOT use Google Translate or any third-party translation widget. All translations are hardcoded by the developer.

4.1 HTML Markup Pattern

Every user-facing text element must carry both language versions as data attributes:

```
<h1 data-es="Salud Mental" data-en="Mental Health">Salud Mental</h1>
<p data-es="Texto en español" data-en="Text in English">Texto en español</p>
```

4.2 JavaScript Logic

- On DOMContentLoaded: read localStorage key 'saludsimple_lang'. Default to 'es' if not set.
- Apply language: loop through all elements with data-es / data-en and set innerText to the active language value.
- Update the toggle UI to reflect active state.
- On toggle click: flip language, save to localStorage, re-apply.
- Store the logic in a single file: js/language.js. Include it in every HTML page.
- The <html lang='...'> attribute must also update to 'es' or 'en' on toggle.

5. Site Structure & Pages

Each section is a separate HTML page. Subpages are also separate HTML files. All pages share the same navbar, footer, and language system. Content is left as placeholder text (e.g., '[Contenido próximamente]') — it will be filled in a later phase.

5.1 Homepage — index.html

- Hero section (see 3.3)
- 7 section cards (see 3.4)
- Optional: a 'Recursos de emergencia' strip below hero (crisis hotline 988, findhelp.org)

5.2 Salud — Seguro Médico y Atención

Main file: salud/index.html

Subpages:

- salud/medicaid-chip.html — Medicaid y CHIP
- salud/marketplace.html — Mercado de Seguros (Marketplace)
- salud/atencion-bajo-costos.html — Atención médica de bajo costo
- salud/dental-vision.html — Atención dental y de la vista

Hero image suggestion: patient.JPG or patient2.JPG

5.3 Medicamentos

Main file: medicamentos/index.html

Subpages:

- medicamentos/como-leer.html — Cómo leer un medicamento
- medicamentos/no-puedo-pagar.html — No puedo pagar mis medicamentos

Hero image suggestion: medicine.JPG

5.4 Niños — Niños y Discapacidad

Main file: ninos/index.html

Subpages:

- ninos/cuidado-infantil.html — Cuidado infantil y apoyo familiar
- ninos/evaluar-discapacidad.html — ¿Mi niño tiene una discapacidad?
- ninos/discapacidades.html — Discapacidades por diagnóstico (landing list page)
- ninos/wic.html — Programa WIC

Hero image suggestion: disable.JPG, pregnancy.JPG

5.5 Comida — Comida y Nutrición

Main file: comida/index.html

Subpages:

- comida/snap.html — SNAP / EBT
- comida/wic.html — WIC

- comida/bancos-alimentos.html — Bancos de alimentos
- comida/ninos.html — Comida para niños (programas escolares, verano, etc.)

5.6 Sistema — Asistencia en el Sistema de Salud

Main file: sistema/index.html

Subpages:

- sistema/entender-seguro.html — Entender tu seguro (premio, deducible, copago)
- sistema/facturas.html — Cómo leer y manejar facturas médicas
- sistema/autorizaciones.html — Autorizaciones y negaciones del seguro
- sistema/donde-atenderse.html — Dónde recibir atención (ER vs urgent care vs médico primario)
- sistema/como-leer-medicamento.html — Cómo leer un medicamento (cross-link from section 2)

Hero image suggestion: patient3.JPG

5.7 Mental — Salud Mental

Main file: mental/index.html

Subpages:

- mental/necesito-ayuda-ahora.html — Necesito ayuda ahora (crisis entry point — 988, crisis lines)
- mental/bienestar.html — Apoyo emocional y bienestar (estrés, ansiedad, duelo)
- mental/ninos-adolescentes.html — Salud mental para niños y adolescentes
- mental/familias.html — Recursos para familias y cuidadores

Note: The 'Necesito ayuda ahora' page must be visually distinct — use a high-contrast banner with 988 crisis line prominently displayed at the top.

5.8 Ayuda — Ayuda General

Main file: ayuda/index.html

Subpages:

- ayuda/findhelp.html — findhelp.org (embed or link with explanation)
- ayuda/211.html — Línea 211
- ayuda/vivienda.html — Vivienda (placeholder — TBD)
- ayuda/asistencia-economica.html — Asistencia económica / childcare.gov

6. Image Placement Guide

Image File	Suggested Placement
medicine.JPG	Medicamentos section — hero banner and index.html card thumbnail
patient.JPG	Homepage hero background image (primary) or Salud section hero
patient2.JPG	Salud section hero (alternative) or Sistema section
patient3.JPG	Sistema de Salud section — 'Dónde atenderse' subpage or section card
pregnancy.JPG	Niños y Discapacidad section — WIC subpage, also usable on homepage card for that section
disable.JPG	Niños y Discapacidad section — hero or disability subpages

All images: use object-fit: cover. Always include descriptive alt text in both languages via data-es-alt and data-en-alt attributes, applied by the language.js script.

7. File & Folder Structure

Root folder: Personal Projects > Ellie's website

```

ellie's website/ |— index.html          (Homepage) |— css/ |— global.css
                  (Variables, reset, typography, navbar, footer) |— hero.css (Hero section styles) |
                  |— components.css      (Cards, buttons, badges, info boxes) |— js/ |— language.js
                  (Language toggle + localStorage logic) |— nav.js (Mobile hamburger menu logic) |
images/          (All provided images go here - DO NOT rename) |— medicine.JPG |—
patient.JPG |— patient2.JPG |— patient3.JPG |— pregnancy.JPG |— disable.JPG |—
salud/ |— index.html |— medicaid-chip.html |— marketplace.html |— atencion-bajo-
costo.html |— dental-vision.html |— medicamentos/ |— index.html |— como-leer.html |
|— no-puedo-pagar.html |— ninos/ |— index.html |— cuidado-infantil.html |— evaluar-
discapacidad.html |— discapacidades.html |— wic.html |— comida/ |— index.html |—
snap.html |— wic.html |— bancos-alimentos.html |— ninos.html |— sistema/ |—
index.html |— entender-seguro.html |— facturas.html |— autorizaciones.html |— donde-
atenderse.html |— como-leer-medicamento.html |— mental/ |— index.html |— necesito-ayuda-
ahora.html |— bienestar.html |— ninos-adolescentes.html |— familias.html |— ayuda/
|— index.html |— findhelp.html |— 211.html |— vivienda.html |— asistencia-
economica.html

```

8. Responsive Behavior

Breakpoint	Width	Behavior
Mobile	< 768px	Single column layout. Hamburger nav. Hero text scales down. Cards stack vertically. Font sizes reduce by ~15%.
Tablet	768px–1024px	Two-column card grid. Nav links may compress or go to hamburger at lower end. Hero image visible.
Desktop	≥ 1024px	Three-column card grid. Full horizontal navbar. Max content width 1200px.

9. Phase 1 Scope (What to Build Now)

This document covers Phase 1 only. Content will be filled in Phase 2.

In scope for Phase 1:

- Complete file and folder structure as specified in Section 7
- Global CSS: variables, reset, typography, navbar, footer, hero, cards, buttons
- language.js: full toggle logic with localStorage and data-es/data-en attributes
- nav.js: hamburger menu for mobile
- Homepage (index.html): hero + 7 section cards + emergency strip
- All section index.html pages: navbar, hero banner (with image), subpage link cards, footer
- All subpages: navbar, page title, placeholder content block '[Contenido próximamente / Coming soon]', footer
- All text elements must already have data-es and data-en attributes with translated labels — even placeholder pages

Out of scope for Phase 1:

- Actual page content / body text
- Search functionality
- Contact form
- Logo (use text placeholder)
- Social media links (use placeholder # hrefs)

10. Developer Notes

- Do not use any CSS framework (Bootstrap, Tailwind, etc.) — pure HTML/CSS/JS only.
- Do not use Google Translate widget. All text must be bilingual via data attributes.
- Image paths: always relative (e.g., ../images/medicine.JPG from a subpage).
- No JavaScript frameworks — vanilla JS only.
- All pages must pass basic accessibility: semantic HTML (nav, main, section, footer), proper heading hierarchy (h1→h2→h3), alt text on all images.
- The 'Necesito ayuda ahora' mental health page must prominently display '988' with a red or high-contrast banner at the top — this is a safety-critical page.
- Use CSS custom properties (variables) in :root for all colors and fonts to make future updates easy.
- Test on Chrome, Firefox, and Safari mobile emulation before delivery.
